

Lawn & Garden

Fair Dinkum Fertilizers **LAWN & GARDEN** is identical to the original Fair Dinkum **GOLD** sold into the commercial growers market which has now been packaged in home garden size.

It may be sprayed on the foliage or used as a soil drench and it is recommended that Fair Dinkum Fertilizers products be sprayed in early morning or late afternoon but not be applied in full sun in the middle of the day.

LAWN & GARDEN contains micronutrients and plant growth hormones that help to produce healthy plants and lawn. It is particularly suitable for natives as it contains very little phosphorus. Scientific studies carried out by Australian researchers have shown it;

- Increases root development
- Contains natural growth hormones
- Builds resistance to drought and other environmental stress

Directions for use

Lawns

Dilute 100 ml to 5 ltrs of water.

1ltr of product is sufficient for 1000 sq metres (0.25 of an acre).
