

# Superfine SPURT

Fair Dinkum Fertilizers **Spurt** is a fortified liquid seaweed designed to give pasture and crops a growth spurt by combining the plant growth regulators from seaweed with nutrients. Crops and pasture often go through periods of low growth because of environmental stress such as drought and prolonged periods of high or low temperatures.

**Spurt** is formulated to work under such situations.

**Spurt** should not be used if frost is a possibility but can be used when there are low non freezing temperatures. **Spurt** works well if there is adequate soil moisture after a period of drought but should not be used if the soil is dry. It is similar to Premium but contains more nitrogen.

Results should usually be visible after 2 weeks.

**Spurt** is made by a three stage process.

The first stage is an alkaline hydrolysis, the second stage components which give "gluginess" are removed, and the third stage is where the nutrients are then added. It consistently out performs single stage products and two stage products when used on their own.

## Application rates

### Pasture, Lucerne & Fodder Crops

Apply whenever the crop needs a short term boost at 5-7 L/ha. Dilute at least 1 part product to 10 parts water, or preferably 1:25 or 1:50. However the product should not be used more than four times a year on pasture unless more than two cuts of hay or silage are taken.

## Vegetables

**Spurt** may be used on leafy vegetables, but use on young seedlings should be avoided as it may cause leaf burn due to the higher concentration of nitrogen.

**Spurt** contains a number of plant growth regulators, simple and complex sugars including mannitol, amino acids and trace elements including iodine, selenium and potassium. It also contains the added nutrients below;

	SUPERFINE SPURT
Nitrogen (N)	10%
Phosphorus (P)	0.3%
Potassium (K)	4.8%
Sulfur (S)	6000ppm
Copper (Cu)	300ppm
Zinc (Zn)	300ppm
Manganese (Mn)	100ppm
Magnesium (Mg)	--
Boron (B)	60ppm
Molybdenum (Mo)	10ppm

%W/V  
ppm

is grams per 100ml of product  
is parts per million on weight basis
