

Increase

animal nutritional supplement

Increase is a blend of liquid seaweed with added chelated copper, zinc, cobalt and magnesium. The copper, zinc and cobalt make a significant contribution to the daily requirement for these minerals. Being in chelated form, these minerals are easily absorbed in the animals gut. The chelated magnesium is simply present to help the absorption of copper, as such its level is too low to contribute significantly to the daily requirement for magnesium. The liquid seaweed contains a number of osmoregulatory compounds significantly enhance the gut bacteria leading to greater utilization of feed.

Overseas research has shown that liquid seaweed or feeding of dried seaweed is particularly beneficial to cattle, leading to greater weight gain and improved general health. Many farmers have reported a general increase in health and vigour after using seaweed extract on a regular basis.

Among the particular benefits farmers have commented on are the following;

- An increase in conception rates
- Increase in fertility
- Better cycling
- Prevention or reduction of scours (calves)
- Reduction in afterbirth retention
- Reduction in milk fever
- Elimination of dry coat
- Improved birth / progeny performance
- Increase in wool quality and quantity (sheep)
- Increase in weight gain
- Improvement in coat shine (Cattle, horses, dogs).

Some of these effects can be closely linked with the known effects of particular components of the liquid seaweed such as osmoregulatory materials, antioxidants and minerals such as selenium, cobalt, copper and zinc.

Application Rates

The recommended daily rate is 1 ml per 50 kg body weight.
Do not use on animals where pasture has an excessive copper content.

Increase may be diluted with 1 part product to 5 parts water and poured over dry feed. Alternatively for cattle **Increase** may be added to water in the drinking trough. Up to 10 ml per 50 kg body weight may be given in one dose, but in such cases the next dose should not be given for at least 10 days.

For calves **Increase** may be added to milk replacement formula.

Approved Organic Input

Analysis	
Seaweed	25 %
Boron	100 ppm
Cobalt	80 ppm
Copper	1.48 g/l
Zinc	1.80 g/l
Magnesium	1.20 g/l
Filtration	100 mic

%W/V is grams per 100ml of product
ppm is parts per million on weight basis
g/l is grams per litre
mic = microns
