Fair Dinkum Fertilizers Increase Animal Nutritional Supplement is based on liquid seaweed extracts that are made from freshly collected storm cast Australian seaweed. It is blended with molasses and other substances containing copper, zinc, cobalt and boron, which is in a form readily assimilated by livestock. Some of the benefits of Increase are; Increased conception rates, better cycling, elimination of dry coat and an increase in general health.

Directions:

Use recommended dose only.

This product should not be used in conjunction with other products that also supply significant amounts of additional copper, zinc, cobalt and boron, as overdose of copper and or zinc may occur. This product must not be used on race horses as it contains cobalt. The recommended rate is 1ml per 50kg body weight.

Dairy and Beef cattle:

60ml p/week over feed, diluted 1:5, or via drinking trough.

Alternatively, Increase may be fed to dairy cattle using a measured dose on feed at 4ml twice a day, or 8ml once a day.

Sheep:

2ml per day normally put over dry feed.

Do not use for animals on pasture with excess copper content.

The recommended daily rate is 1 ml per 50 kg body weight.

Analysis

Seaweed	25 %
Copper	1.48 g/l
Zinc	1.80 g/l
Magnesium	1.20 g/l
Boron	100 ppm
Cobalt	80 ppm
Filtration	100 mic

Increase - 20 ltr

%W/V is grams per 100ml of product
 ppm is parts per million on weight basis
 g/l is grams per litre
 mic = microns
