200 ltr

1000 ltr

Fair Dinkum Fertilizers Quik Grow is a blend of urea, a stabiliser and a liquid seaweed softener. It is designed to be used on crops or pasture where there is a need for a rapid increase in the nitrogen level in established plants but the user wishes to avoid the problems caused by the application of granular urea. It is particularly useful on pastures on dairy farms when feed is in short supply. Quick Grow should ideally be used within three months of purchase.

Directions:

Quick Grow is designed for promoting growth in fertile soils during low growth periods. Mix 1 part Quick Grow with at least 15 parts water. DO NOT apply if temperature is over 23 degrees C. Apply late in the afternoon or early evening.

Pasture - Dairy Rotation System

Apply up to 15 ltrs of Quick Grow per hectare in low growth periods.

To get maximum pasture growth apply as soon as practicable after grazing stock have been removed. May be reapplied after 4 weeks.

Pasture – Beef or Sheep

Apply up to 15 ltrs of Quick Grow per hectare in low growth periods if soil moisture low. Up to 25 ltrs of Quick Grow may be applied if soil moisture is high and rain is expected within a few days.

May be tank mixed with Premium or Spurt liquid seaweed. Add water and Quick Grow to the tank, then add Premium or Spurt. Store out of direct sunlight.

Broad Acre Crops

Apply up to 15 ltrs per hectare when a nitrogen boost is needed.

Do not apply within 3 weeks of expected flowering or if frost is likely.

Quick Grow - 20 ltr
