Fair Dinkum Fertilizers Roses has been specially formulated as a concentrated fertilizer for roses. It contains liquid seaweed made from storm cast kelp freshly collected from the Australian coast. It also contains added humates, fulvates and trace elements to increase the frequency of flowering and the color of blooms.

Directions:

Roses is a concentrated complete fertilizer and should not be applied at a greater rate than recommended. It may be supplemented in early spring by one or two treatments with Fair Dinkum Fertilizers Fish Emulsion or a small amount of composted animal manure.

Recommended to be applied as a soil treatment.

Do not use as a foliar spray if flowers are present as product may stain. Avoid spraying on paths or buildings as spray may stain concrete or woodwork. Dilute 1 part of product to with at least 20 parts of water.

Established Roses:

Add 40 ml of product to 9 ltrs of water. Apply with a watering can every two weeks throughout the growing season.

Freshly Planted Roses:

Allow roses to become established before treating with Roses. Use Fair Dinkum Fertilizers Gold at planting out.

Roses - 20 ltr

Analysis	
Nitrogen	3.2 %
Phosphorus	1.8 %
Potassium	6.6 %
Boron	60 ppm
Copper	150 ppm
Iron	205 ppm
Magnesium	580 ppm
Manganese	105 ppm
Zinc	45 ppm
Filtration	100 mic

%W/V is grams per 100ml of product
ppm is parts per million on weight basis
g/l is grams per litre
mic = microns
