Fair Dinkum Fertilizers Tomatoes is a liquid based seaweed product that has been specially formulated for tomatoes. It has added nitrogen, phosphorus, potassium and trace elements. The Tomatoes formulation will enhance fruit set and development, and will give better availability of both macro and micro nutrients with less build up of salts in the growing medium.

Directions:

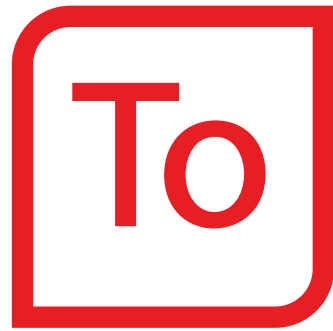

May be applied as a soil treatment or foliar feed.
 Dilute at least 1 part product to 20 parts of water.
 Do not apply to foliage if temperature is above 23 degrees C.
 Do not apply until nights are frost free.
 Fair Dinkum Tomatoes is a complete concentrated fertilizer and should not be applied at rate greater than those recommended but may be supplemented in early spring by one or two treatments with Fish Emulsion.
 Do not apply to transplanted seedlings until established.

Established Seedlings:

Add 20 ml of product to 9 ltrs water and apply with a watering can every week to ten days.

Established Plants:

Add 30 ml of product to 9 ltrs of water and apply every week to ten days. Be careful to water regularly as irregular watering may cause fruit to split.

Tomatoes - 20 ltr

Analysis	
Nitrogen	4.0 %
Phosphorus	1.5 %
Potassium	7.1 %
Copper	180 ppm
Zinc	60 ppm
Manganese	155 ppm
Boron	90 ppm
Iron	420 ppm
Magnesium	1100 ppm
Filtration	100 mic

%W/V is grams per 100ml of product
 ppm is parts per million on weight basis
 g/l is grams per litre
 mic = microns
